Local Capacity-SWCD Funds provided to one Soil and Water Conservation District (SWCD) to implement the Agricultural Water Quality Management Area Plan to the fullest extent practical. This project includes providing outreach and technical assistance to local landowners to: 1) promote and implement the Oregon Plan for Salmon and Watersheds; 2) improve landowner involvement in conservation activities that enhance water quality and habitat for salmon; and 3) develop assessments and apply strategies to achieve the goals of the Oregon Plan.	141,860	
Outreach Funding for programs that build on existing pesticide monitoring and will reduce pesticide runoff into local waters that undermine survival of threatened native salmon; and engage students, teachers and volunteers in stewardship opportunities that promote individual and community responsibility for watershed health.	94,392	
Restoration Fourteen grants provided funding for a variety of restoration projects that include addressing invasive plants; oak woodland restoration; and improving riparian and instream habitat and water quality. For example, a project on the lower Clackamas River, which is rearing and migration habitat for ESA-listed salmon and steelhead, will improve flood resiliency, increase ecological habitat value for aquatic and terrestrial species, and improve water quality.	364,007	
Technical Assistance Funds provided technical assistance to assist affected landowners in flood-impacted mainstem neighborhoods in the Sandy River Watershed toward effective restoration through developing: 1) designs for side channel reconnection in a demonstration reach that encompasses priority salmonid habitat, residential development, and significant road and utility infrastructure; and 2) a restorative design handbook.	33,003
